SCHEDULE B

Service Levels

1 SERVICE LEVELS

1.1 Help Desk Response and Resolution Times.

Help desk response time and resolution of problems will be measured for service calls (telephone or email) placed by Customer to Boréal's help desk each calendar month. Boréal's response time to service calls to the help desk will be measured as the time between the reception of a call or email and the acknowledgement of its reception by Boréal during regular business hours (Monday to Friday, 9am to 5pm Eastern Time – GMT-5). Boréal's resolution time of problems reported in a service call will be measured as the time between the acknowledgement of the reception of the service call by Boréal and the implementation by Borealis of a fix or workaround for the problem reported. The Service Level for response and resolution times to service calls:

Severity	Target Response Time	Target Resolution Time
1 – High	4 hours	24 hours
2 – Medium	8 hours	5 Business Days
3 - Low	8 hours	Next release

For the purposes of this Section, the severity level and corresponding description referred to in the table above have the following meanings:

Severity 1 - High - A Severity 1 Problem arises when the Online Service cannot be accessed or is unable to function properly and no workaround is immediately available.

Severity 2 - Medium - A Severity 2 Problem arises when a major feature or functionality is not available or not functioning properly and use of the Online Service is severely reduced or impacted.

Severity 3 - Low - A Severity 3 Problem arises when a minor problem exists with the Online Service and a workaround is available or when the problem is cosmetic.

Issue Escalation. In the event Boréal fails to meet a response or resolution time set forth above, Customer may escalate the issue to the relationship managers identified below and thereafter to the senior management identified below:

- 1st escalation step: [●]

1.2 **Availability.** Boréal will make the Online Service available at least 99.5% of the time ("**Availability Target**"), except as provided below. Availability will be calculated per calendar month, as follows:

$$\frac{(Total - Downtime)}{Total} * 100 \geq Availability Target$$

Where:

- **“Total”**: means the total number of minutes in the calendar month minus the number of minutes of Excluded downtime during such month;
- **“Excluded”** means:
 - Any planned downtime of which Boréalís gives 48 or more hours’ notice in accordance with this MSA, by email or via a conspicuous on-screen message in the Online Service. Boréalís will use commercially reasonable efforts to schedule all planned downtime during the hours 12 AM to 8 AM Eastern time on Saturday or Sunday, except downtime for major service releases, which Boréalís will use commercially reasonable efforts to schedule during the hours from 6:00 p.m. Friday to 3:00 a.m. Monday. Boréalís will use commercially reasonable efforts to notify Customer of major releases at least one week in advance; or
 - Any unavailability caused by a Force Majeure event, including, without limitation, strikes or other labor problems (other than those involving Boréalís employees), computer or telecommunications failures or delays involving hardware or software outside of Boréalís’ physical or logical infrastructure and denial-of-service attacks out of Boréalís’s control.
- **“Downtime”**: means downtime that is not Excluded.

For any partial calendar month during the Subscription Term, availability will be calculated based on the entire calendar month, not just the portion for which Customer subscribed.
